

WE ARE FRONTIER AND WE LOVE THAT.

COLOCATION

**WE HAVE OUR
HEADS IN THE
CLOUD.**

Colocation

Our colocation facilities provide an on-ramp to the Frontier Network, as well as to alternate carriers.

We have the space that you need for your latest cloud computing offering or for connecting your servers and routers to the Internet. Frontier Networks' state-of-the-art colocation services can provide you with a direct connection to any of our existing carrier neutral colocation facilities.

Frontier colocation facilities house premium space built according to uniform environmental and security standards for power, cooling, fire suppression, and security. Colocating in a Frontier Networks facility will help reduce your exposure to security and environmental threats and enhance your business operations.

Neutral

Connect to whomever you want in our building and space without restrictions of your move.

Scalable

Facilities as small as a single 1u of space for one device or an entire room.

Amazing Up-time

Diverse power and cooling.

Cost Savings

All racks come pre-configured with broadband and cross-connects to save you money.

Reactive

Our support and field work is 24 / 7 / 365.
