

WE ARE FRONTIER AND WE SAY THAT.

**PHYSICAL
SECURITY**

**SAFE
& SECURE
AND ALWAYS
MONITORED.**

Physical Security

**It is less money
and better.
Much better.
(And we see more).**

Door Contacts,
Security Cameras,
Smoke Detection,
Alarm Systems,
Glass Break,
Alerts,
Motion Sensors,
Temperature Sensors

Frontier Networks is where the new Internet of Things (IoT) and traditional alarm monitoring meet.

Old alarm technologies use old expensive phone lines. Ours don't.

In a Physical Security environment designed by Frontier Networks, we want an alarm system to work the same as our broadband - always on. This active/active always on monitoring environment is delivered as part of our broadband bundle.

Single Bill

Web, electronic or paper bill. Simplified account codes - easy to understand.

Single Vendor

One bill, one company to call and one agreement.

24 x 7 Monitoring

Our provided alarm system is monitored by Frontier's Network Operations Centre. We alert on all sensors and will work with you to establish alert protocols.

Comprehensive

Our support and field work is 24 / 7 / 365.

Always On

Highly trained support technicians and help-desk staff are always available.
